

# ADI IMPLANT MASTERCLASS AND AGM

## “Accelerated Implant Dentistry”

presented by

**Frank L Higginbottom DDS**

**& Thomas G Wilson Jr DDS, Texas, USA**

plus

## “Practical Guided Bone Regeneration Workshop”

**Monday 7 November 2005**

**RCOG, Regent's Park, London**

As part of its continuing postgraduate education programme, the **Association of Dental Implantology** is delighted to offer a major implant masterclass and practical workshop prior to its **Annual General Meeting**.

**4 hour afternoon MASTERCLASS aimed at professionals of varying implant experience**

The concept of “**Accelerated Implant Dentistry**” is something our patients are always keen to embrace, but there is no doubt that in the wrong hands, and with inappropriate case selection, the end results can sometimes fail to impress. The Masterclass will not only give a scientifically reasoned approach to many of the techniques currently ‘in vogue’, but will also give tips and suggestions for many aspects of our normal daily clinical implant practice.

This is a unique opportunity to enjoy the expertise and wisdom of one of the best surgical/prosthetic ‘double acts’ in implant education. Both speakers are renowned ‘wet-fingered’ presenters who will cover a range of clinical, patient-centred topics to enable the most efficient, evidence-based approach to implant treatment.

**Morning Workshop is now FULL. Places available for the Major MASTERCLASS starting at 13.00hrs**

**BOOK NOW!**

For information and reservations contact the **ADI**
